

12 Month Business Mastery Program

Your 12 Month Business Mastery program grows the mastery you have over your business while also growing your revenue, cash flow, profits and business value. Starting with a two-day planning workshop to deliver a strategic way forward for you and your business while creating a strong financial foundation to work from.

Depending on which option you choose, we work with you either biweekly or weekly to build and implement strategies to achieve the goals developed during the two-day strategic planning workshop. We'll continue to work with you on new strategies and to update your business's critical success factors.

At the end of 12 months of working together you'll have an additional one-day planning session to set your business up for even greater success over the following 12 months.

12 Month Business Mastery Program

Guaranteed to give you mastery over the development of your business while growing your revenue, profits, cash flow and business value.

Key Benefits From Your Business Mastery Program

■ Two Day Strategic Planning Workshop

At the beginning of the project we'll spend two days together to map out the strategic direction of your business and to put that direction into a robust business plan. Your live business plan will give us a road map toward the next twelve months and what needs to be accomplished during each of our biweekly meetings.

■ Biweekly Meetings To Implement Plans

To grow your business and ensure the outcomes of your business plan are realised we'll work with you bi-weekly in face to face business improvement sessions.

Each session will cover how the business went implementing the previous session's strategies, what needs to be implemented over the next two weeks, and what critical areas of the business need to be addressed immediately. Giving a focus on overcoming (1) immediate issues, and (2) working toward long term improvement.

■ One Day Strategic Planning Workshop

Toward the end of the 12 months we'll spend a full day to assess the past 12 months and the gains we have made so we can set the strategic direction for the next 5 years. We'll update your live business plan and develop new strategies of what needs to be accomplished over the next 12 months.

■ Matching Your Personal Goals With Your Business Goals

During our two-day strategic planning workshop, we'll work with you to match your personal goals with your business goals, so your business drives greater returns for you personally. This focus ensures your lifestyle options, personal asset growth and free cash flow improves as your business grows.
